

Costs of Most Common Medical Services - Transparency in Health Care Prices Act

Community health centers offer service to all individuals regardless of insurance status or ability to pay. Patients in households with incomes below 200% of the Federal Poverty Level (FPL) receive discounts on a sliding fee scale. Patients with incomes less than 100% FPL pay a nominal fee.

Below are some of the most common services provided. The costs below represent the cost of services for self-pay patients and do not take into account any coverage from Medicaid, Medicare, or private health insurance. Contact us if you would like help enrolling in health insurance coverage.
